

## **New Developments and Challenges in Pancreatic Surgery in VHL**

---

### **Menno Vriens**

Professor, Department of Surgical Oncology, UMC Utrecht, Utrecht, the Netherlands

Surgery is the cornerstone for the treatment of VHL related PNETs. Based on location, size and relation to adjacent structures, a surgical custom made strategy is proposed by the medical team. New techniques, like robot surgery have been introduced and surgical indication, based on genetic profiles of the tumors will be discussed.
